# What Do You Think?

**Name_____ Date_____**

**<u>Directions</u>: Read the question and answer based on the information you learned in class.**

**Think about what we learned today in class. Why is the decibel scale important? What are the characteristics of the objects found at the top of the decibel scale? Once cilia are damaged, they can never be repaired and hearing can be affected. What problems would you face if you couldn't hear well? How could you solve some of these problems?**
